

# GO ANYWHERE<sup>®</sup>

## Managed File Transfer

**Server-to-Server**

**Person-to-Person**

GoAnywhere MFT is an enterprise-level solution which will secure, automate and manage all of your organization's file transfer needs through a single interface. With extensive security controls and detailed audit trails, GoAnywhere MFT will help your organization comply with data privacy regulations and PCI DSS. This innovative solution automates Server-to-Server file transfers and simplifies Person-to-Person file sharing and collaboration.

### Access Anywhere

Web Browser,  
Command Line, API...

- Workflow Automation
- Encryption
- Compression
- Data Translation
- Scheduler
- Folder Monitors
- Inbound and Outbound
- Ad Hoc and Batch
- File Sync and Sharing
- Custom Secure Forms
- Secure Email
- Partner Management

and File Transfers

### Quick Facts

- Multi-platform
- Browser and API Interfaces
- Single Point of Control
- Encryption Standards
- Detailed Audit Trails
- Compliance Reports
- Active-Active Clustering

### Create Workflows using Drag-n-drop

**Component Library** 🔍

- 📦 Compression
- 🗄 Database
- 📄 Data Translation
- ✉ Email & SMS
- 📁 File System
- 📁 File Transfer
- 🔗 Integration
- ⚙ Job Control
- 🔄 Loops
- 📁 Miscellaneous
- 📧 MQ
- 🔒 PGP
- 📁 Project
- 📄 Reports
- 🌐 Web Services

**Project Outline**

- 📁 Send Encrypted File
  - 📁 Main
    - 🔗 Connect to Database
      - 📄 Retrieve Data
    - 📄 Convert to CSV
      - 📄 Data Options
    - 🔒 PGP Encrypt
    - 🔗 SFTP
      - 📄 Put Files

The intuitive interface and extensive workflow features in GoAnywhere MFT help eliminate the need for traditional file transfer scripts, single-function tools and manual processes.

- Use a modern browser-based dashboard to configure and monitor file transfers
- Create multi-step workflows to transfer, encrypt and process files
- Connect to a wide variety of servers for exchanging data using standard protocols
- Allow trading partners to securely connect and exchange files with your organization
- Integrate with existing applications and programs using commands and APIs
- Monitor folders for new files and process immediately
- Schedule file transfers to run at future dates and times with custom calendars
- Translate data to/from popular file formats and databases
- Protect data at rest and in motion using industry standard encryption and file transfer protocols
- Keep sensitive files out of the DMZ while protecting the private network
- Accelerate large file transfers over UDP data channels
- Maintain compliance with detailed audit logs and reports
- Segregate users and administration into separate security domains
- Cluster installations for scalability and active-active high availability

The dashboard screenshot shows a navigation menu at the top with options like Home, Resources, Workflows, Services, Users, Logs, Encryption, System, and Help. Below the menu is a 'My Dashboard' section with 'Add Gadget', 'Edit Layout', and 'Refresh' buttons. The main content area includes:

- Quick Links:** Resources, Projects, Scheduler, Triggers, Admin Users, Web Users, Audit Logs, Reports.
- Service Statistics - Inbound Connections:** A pie chart showing 251 Uploads (green) and 98 Downloads (blue).
- Completed Jobs - Summary:** A bar chart showing the number of jobs completed per day of the week (Sun-Sat).
- Recent Blacklisted IP Addresses - Detail:** A table listing IP addresses, reasons for being blacklisted, and the time of the event.

# COLLABORATION

## Person-to-Person

GoAnywhere MFT allows your employees, customers and trading partners to efficiently share files and collaborate from any authorized computer or mobile device using intuitive screens and apps.

Sensitive files are encrypted at rest with centralized access controls in order to meet strict compliance requirements. All transactions are audited in a central database for reporting purposes.

## GoDrive

GoDrive provides Enterprise File Sync and Sharing (EFSS) for your employees and partners. Files and folders are easily shared between users with advanced collaboration features.

- Sync files across Windows, Mac and mobile devices
- Protect files with end-to-end AES 256 bit encryption
- Set disk quotas at the global and per-user level
- Track file revisions and comments
- Restore deleted files from a trash bin
- Remote wipe lost or stolen devices

## Secure Folders

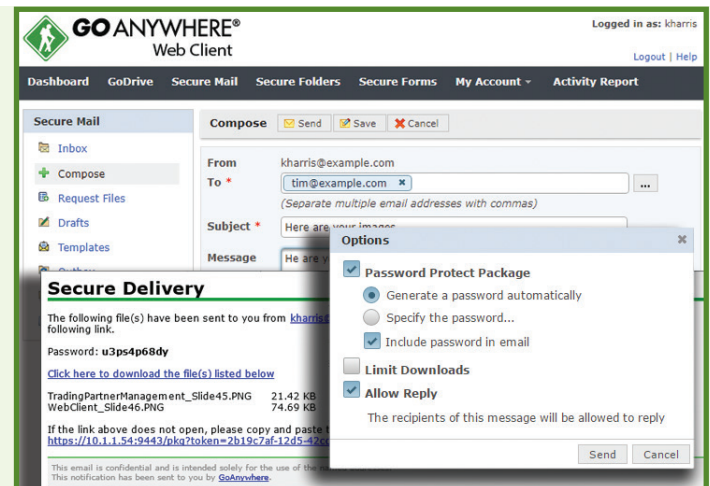

GoAnywhere MFT offers an intuitive HTTPS Web Client that allows employees, customers and trading partners to quickly transfer files between their desktop and your server using the convenience of their web browser.

- Authenticate users against Active Directory or LDAP
- Set granular folder permissions
- Drag-n-drop within a modern HTML 5 interface
- Trigger actions to send email alerts or run workflows
- Encrypt files at rest and in motion
- Rebrand interface with custom logo and privacy text

## Secure Mail

Secure Mail allows employees to send confidential messages and files as secure HTTPS links using the convenience of Microsoft Outlook or an intuitive Web Client.

- Send large files without limitations
- Encrypt and store files/messages (packages) on-premise
- Protect packages with unique tokens or passwords
- Expire packages after a specified number of days
- Limit the maximum number of file downloads
- Allow secure replies with confidential messages and files

## Protocols and Standards

### Encryption and Compression

AES	SSH
FIPS 140-2 Compliance	SSL
GPG	TLS
Open PGP	ZIP, GZIP, TAR

### Connectivity

AS2 (Drummond Certified)	Message Queue
Amazon S3	SFTP / SCP / SSH
Azure Blob	SMB / CIFS
FTP	SMS Text Messages
FTPS	SMTP, POP3, and IMAP
GoFast Acceleration	SNMP
HTTPS	WebDAV
ICAP for Antivirus & DLP	Web Services (SOAP/REST)

### Databases

DB2	Oracle
IBM DB2 for i	PostgreSQL
Informix	SQL Server
MySQL	Sybase

### Translation

Delimited text	Flat File and Fixed Width
Excel	XML

### Authentication

Active Directory
LDAP
IBM i
Database
RADIUS (RSA SecurID)
SAML for single sign-on and dual factor authentication
SSH Keys
SSL Certificates

## Platforms

Windows	Mac OS
Linux	UNIX
AIX	VMware
IBM i	Solaris
Amazon EC2	Microsoft Azure

## Technology Partners

## Logging and Compliance Reporting

GoAnywhere MFT generates comprehensive audit logs of all file transfer activity in a central database which can be searched and viewed through the browser-based administrator.

The advanced reporting module in GoAnywhere MFT allows you to gain access to this important audit information as easy-to-read PDF documents.

These reports can be run instantly through the browser-based console and scheduled for distribution to the network or via email.
