Legend:

- indicates the item is fully supported
- indicates the item is not supported
- indicates the item is under development and will be incorporated in next release

Notes:

- 1 Host protocol refers to the communications protocol between storage clients and Bloombase StoreSafe
- 2 iSCSI is Internet Small Computer System Interface, an Internet Protocol (IP)-based storage networking standard for linking data storage facilities, developed by the Internet Engineering Task Force (IETF). By carrying SCSI commands over IP networks, iSCSI is used to facilitate data transfers over intranets and to manage storage over long distances.
- 3 With iSCSI HBA or generic network interface card(s) installed, can be on copper or fiber-channel interconnects
- 4 Storage protocol refers to the communications protocol between Bloombase StoreSafe appliances and storage sub-systems
- 5 Fiber-channel HBA card(s) required
- 6 iSCSI HBA or generic network interface card(s) installed
- 7 With Ultra SCSI card(s) installed
- 8 Applicable iSCSI devices only
- 9 SNMP versions 1, 2c, 3
- 10 Web-based management console secured by SSL over HTTP

Compatibility Matrix for Bloombase StoreSafe

- 11 The following PKCS#11 has been validated
 - AEP Networks Keyper
 - Oracle Sun Crypto Accelerator
 - Sophos Utimaco SafeGuard CryptoServer
 - Thales nShield
 - HP Atalla
 - IBM 4758 Cryptographic CoProcessor
 - IBM eServer Cryptographic Accelerator
 - IBM Crypto Express2
 - IBM CP Assist for Cryptographic Function
 - Cavium NITROX XL
 - Other PKCS#11 compliant hardware security modules

- 12 Only fault-tolerant cluster with central multi-processing synchronization control can be employed for cluster purpose
 - Virtual server utilities
 - Hardware clustering, e.g. blade systems
